Summary

A motivated B.Tech in CSE student with a focus on C Programming and Data Structures & Algorithms. Worked in building system-level applications and optimizing memory utilization through academic coursework and hands-on internship experience. Seeking to leverage technical skills in Software Engineering to contribute to building highly efficient, scalable backend systems.

Education

Galgotias University

B.Tech in CSE; CGPA: 7.9/10.0

Gautam Buddh Nagar, Uttar Pradesh, India

Expected Graduation: August 2028

NATIONAL INSTITUTE OF OPEN SCHOOLING

Score: 72.8%

Haryana, India

Completion: May 2024

Technical Skills

Languages: C, Java, Kotlin, Node.js, Python, SQL

Frameworks/Libraries: POSIX Threads, Standard Template Library (STL), NumPy

Databases/Cloud: MySQL, PostgreSQL

Tools: Git, Linux, Docker, GDB, Postman

Concepts: Data Structures & Algorithms (DSA), System Design, Operating Systems, Object-Oriented Programming

Projects

resQnet | Kotlin, Google Nearby Connections, Room Database, AES-256 | GitHub

- Engineered a decentralized, offline mesh-networking Android application utilizing Wi-Fi Direct and BLE state restoration to enable critical SOS broadcasting in internet-denied disaster zones.
- Designed a custom Store-and-Forward routing engine utilizing Room Database for rapid message deduplication and dynamic TTL (Time-To-Live) hop-count tracking, preventing infinite network loops.
- Integrated AES-256 cryptographic payload isolation and an autonomous Zero-UI handshake via a P2P_CLUSTER topology, ensuring secure, background node discovery for emergency responders.

Multithreaded Web Server | C, POSIX Threads, Sockets | GitHub

- Engineered a concurrent web server that handles HTTP GET/POST requests for 1,000+ simultaneous clients.
- Achieved <50ms latency under high load by implementing a custom thread pool mechanism and optimizing socket I/O operations.

Certifications

Red Hat Training: Getting Started with Linux Fundamentals (RH104 - RHA) - Ver. 9.1 | Red Hat (June 2026)

Red Hat System Administration I (RH124 - RHA) - Ver. 9.3 | Red Hat (June 2026)

Database Programming with SQL | Oracle Academy (December 2025)

Achievements

- ☐ **Startup Incubation & Pitching:** Currently architecting and presenting "ResQnet" to university incubation panels, demonstrating a fully functional zero-infrastructure Android mesh network and B2B2C revenue model.
- ☐ **MSME Idea Hackathon 5.0:** Advanced through the initial selection rounds via the university Host Institute by proposing innovative, scalable software solutions.
